

**The Pennsylvania State University
Architecture & Landscape Architecture Library
Refereed/Juried Journals Questionnaire Response Rates**

We began the project with a list of 248 journals in the fields of architecture, landscape architecture, and urban planning. The titles can be grouped into four categories as shown in Figure 1.

Journals in Architecture, Landscape Architecture, and Urban Planning

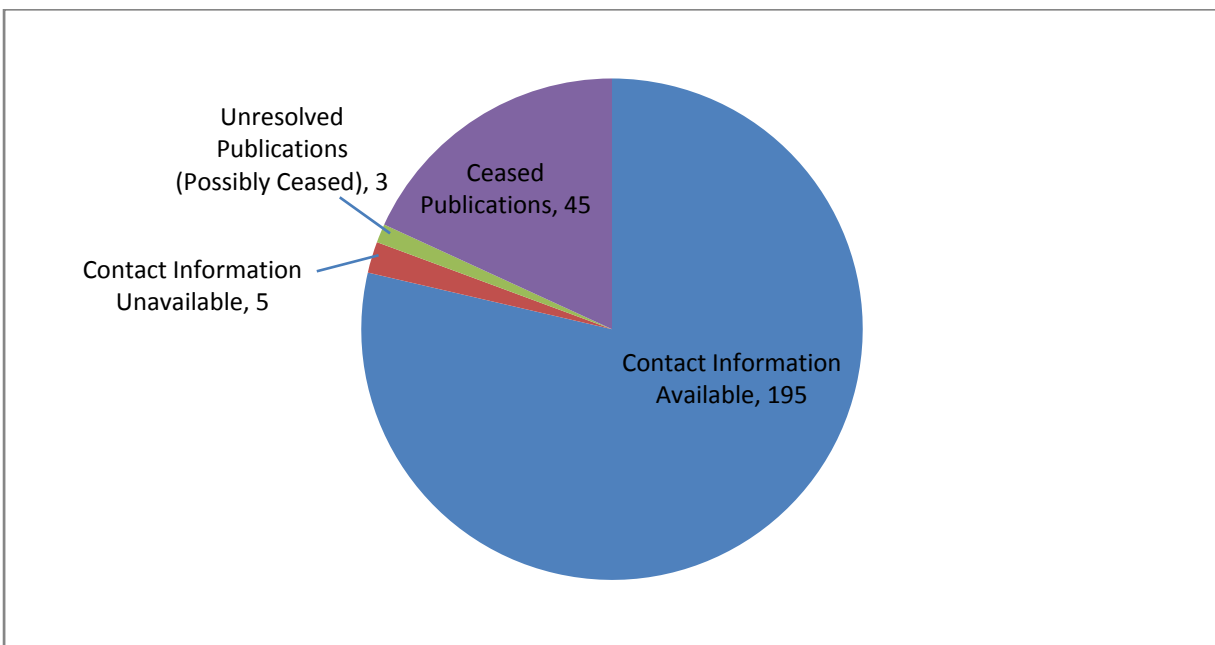

Figure 1

Of the 248 journals, only 195 publications had available contact information. We sent a questionnaire to these 195 journals by either email or letter in April 2007. After the first contact, we received responses from 68 journals. We contacted those journals that had not responded a second time in June 2007. We received an additional 31 responses from journals, bringing our total response to 99. This information is shown in Figure 2.

Journals that Responded to the Questionnaire
